The Computational Social Science Society of the Americas
2023 International Conference

You are invited to participate in the Computational Social Science (CSS2023) annual conference. The conference will be held in-person at The Drury Plaza Hotel in Santa Fe, New Mexico, November 2–5, 2023, near the historic central plaza in downtown Santa Fe.

Call for Papers, Posters, Proposals, SIGs, Workshops, and Tutorials
Submissions due July 28, 2023

This year, in the interest of realizing the potential of Computational Social Science to achieve broad impacts, we extend a special welcome to papers, posters, and discussions that address and/or demonstrate applied Computational Social Science.

Submissions: The CSS Program Committee invites original papers and posters concerning computational models and analysis of social phenomena. Models from all social science disciplines are welcomed. All submissions, including posters, will be subject to peer review. The PC and conference organizers may request that submissions for papers be converted into posters depending on scheduling and content. For more info, including template, see: https://computationalsocialscience.org/conferences/css2023/.

Papers: Papers should be between 3,000 and 5,000 words in length, including all figures, tables, notes, references, and appendices. ODD documentation of models is encouraged and can be attached to a submission without counting against the word limit. The paper submission deadline is July 28.

Posters: Poster submissions require only an ~800 word abstract for submission. They should be clearly marked as poster submissions in the title. Poster abstract submissions are due July 28.

Special Interest Groups (SIG): CSS2023 will include SIG sessions before the full conference. If you are interested in organizing a SIG workshop or tutorial, please send a brief description to css2023@computationalsocialscience.org by July 28th. SIG sessions can take a wide variety of forms, ranging from tutorials and workshops to group discussions or hackathons. SIGs that are approved by the conference organizers will be announced and provided with meeting space. When planning your SIG event please make sure to include an estimated duration of the event in your proposal. The deadline for SIG proposal submissions is July 28.

Paper Publication: All CSS2023 accepted papers are eligible for publication in the proceedings. Proceedings format and template can be found at the conference website: https://computationalsocialscience.org/conferences/css2023/.

Awards: This year we will have three awards. The award for *Best Paper* carries a $500 prize sponsored by the Computational Social Science Society of the Americas. The award for *Exceptional Policy Analysis in a Poster* carries a $300 prize sponsored by Complexity and Policy Studies (CAPS). The award for *New Voices in CSS* – given to impressive work by someone new to the conference – carries a $200 prize sponsored by the Computational Social Science Society of the Americas.

Important Dates:

SIG Proposal Due: July 28, 2023	**Early Bird Registration Closes: September 15, 2023**
Paper / Poster Submissions Due: July 28, 2023	**Publication Ready Version: October 21, 2023**
Author Notification: September 1, 2023	**Conference Dates: November 2 – 5, 2023**
